Danelectro

CONVERTIBLE

NEUTRIC ELECTRIC. As a non-electric, this model produces clear sustained tones. The special pickup kit may be added if and when desired, to convert to electric guitar. Simple installation. Hand-tied nylon base decorative bracelet.

GUITAR WITHOUT PICKUP ..... from standard Sandwiche wood, fully adjustable bridge.
Western ... Model 6200 ..... $45

PICKUP KIT includes all controls and all fit and dependable equipment for Model 6200 guitar. Add this kit any time you want an electric.
Model 6201 ..... $50

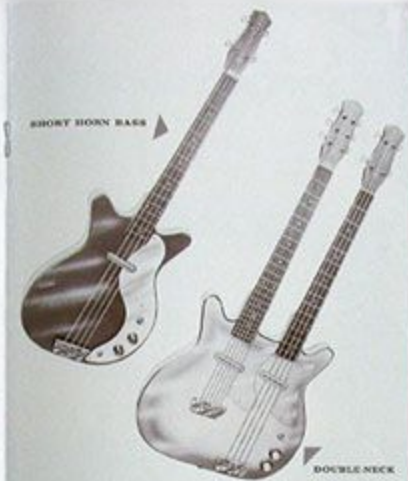
GUITAR WITH PICKUP ..... Same as 6200 with Pickup. Will be completely assembled at the factory. May be used with or without amplification.
Western ... Model 6201X $60

GUITARLIN

This new instrument is a guitar with fingerboard connected deep into the body. It thus combines the guitar and mandolin range. Tuned and played as a guitar with regular guitar strings. Guitar tone is heard regular. Guitar is available in upper register.
Western Combined ... Model 6120X ... $150

LONG HORN BASS

Combined refinements have resulted in a superb instrument. Even is more a sport should sign, 7-4 plagiarist and has thin patterns. Available in two models, 6 string or 8 string, in bronze finish only.
6 STRING BASS ... Model 6412X ... $150
8 STRING BASS ... Model 6613X ... $150



ORIGINAL DESIGNS

SHORT HORN BASS

Condensed design makes this new Bass more overall size as guitar. Economies effected by using our standard guitar parts brings the price of this Bass way down. Available in 6 or 8 string models, in bronze finish only.
6 STRING BASS ... Model 6412X ... $95
8 STRING BASS ... Model 6613X ... $95

DOUBLE NECK

Guitar and bass. Compact one body design, overall size 37½" x 20". Is smaller than some concert model guitars. Separate tone and volume controls for each neck. Three way switch controls either neck alone or both together. In body, either neck reach. White bonded.
DOUBLE NECK Model 6021X ... $175
HARD SHELL CASE Model 6043 ... $ 35

Danelectro TOTALLY SHIELDED

Noises from neon lights, flashers, motors, etc. can reach into the wiring of all makes of instruments. Now Danelectro has eliminated this interference by totally shielding every bit of wiring, every attachment, part within the instrument. That's why objectionable noises are banished forever!

SLIM NECK-NOSE NECK

Two steel I beams inside the neck provide stiffening to resist all warping and twisting that would distort tension. 5 tension points adjusting truss. Fingerboard is precision Brazilian rosewood. Position markers are hand-filled for permanence and beauty. Frets are precision installed by special machinery designed and built by Danelectro.

FOUR WAY MONOTABLE BRIDGE

Up, down, forward and back. This bridge patently achieves total adjustment for perfect action, as well as higher precision for whatever degree of stiffness may be desired. Recessed slide provides precise string length adjustment.

POINTER CONTROL

Each Neck-Neck pointer turns this unit responding pickup on or off. Each pickup is graduated for any playing. Six neck ranges, treble, middle or bass. This results in the simplest, fastest selection of many different tone colors.

HARD SHELL CASE Fits all Danelectro guitars and basses in this strong tweed double model.
Model 6043 ..... $30

E (low) Stock No. 950 ..... $2.00

Danelectro REVERB

The Danelectro system of reverberation** makes use of multiple delaying springs to achieve the most beautiful effects. Three springs, each having a different delay, combine to produce a myriad of reflections. A control on the panel mixes non-reverberated sound with reverberated sound to any desired degree, permitting you to select just the amount of reverberation you want. At maximum setting the sound takes on an ethereal out-of-this-world quality.

TWIN-TWELVE

with built-in **REVERBERATION**
